# Ask 'Em Info Pages

Created by Vasili Savitski    ×    vasili.savitski@gmail.com

## Overview

You will need the following files for your project:

_askem.html
_guidance.html
_faq.html
_questions.html
_welcome.html
modal_style.css

If you want to make any changes, you can use style.sass as well.

## HTML

I made special templates so you can manipulate them when including into your project. I included that code into index.html manually just for a showcase.

## CSS

Feel free to remove my RESET.
I used prefix 'modal_' to my styles so there shouldn't be any CSS conflicts.

## JS

Feel free to remove my simple script from the header. It was written just to show you how the template work.
I used the simpliest way to hide and show elements by using display property.

## Customizing

Here are some things that can be improved with JS.
Custom scrollbars and more advanced navigation through pages, as I used anchors.
